

Wicken Streetlights

July 2021

Important Information

Each location has a photograph with an overlay of the expected light pattern as predicted by the manufacturer. The overlay is centred on where the lamp standard will be.

Overlays will vary in size on the photograph as the background at not all the same magnification.

The size of the overlay has been set with reference to measurements made on the photograph to ensure the scale is correct

Important Information

Each overlay represents the following distances:
Left 16m, Right 16m, Front 4m, Behind 3m

Each overlay is derived from the data supplied by
ARK. The DW Windsor pattern would be larger:
Left 20m, Right 20m, Front 10m, Behind 7m

The outer edge of the overlay represents where the
visible light would be equivalent to 1 Lux. 1 Lux is
equal to the illumination of a one metre square
surface that is one metre from a single candle.
